

FLUID CHECK

PROVIDING FLUID ANALYSIS & DIAGNOSTIC SERVICES

Road & Rail Transport, Power Generation & Distribution, Construction, Mining, Industrial and Marine

Fluid Check analysis is Exol Lubricants new market leading complete fluid analysis programme for monitoring all types of fluid lubricated and insulating oil systems.

In all cases your machinery represents a significant investment by your company and it is so critical it remains operational at all times. Failure of your machinery can result in loss of operation, with associated costs running at times into thousands of pounds an hour.

Imagine if your business was suddenly unable to provide its services or product, consider the damage it could do to your business and your customers' confidence in you to deliver on time or even at all...it must not happen - if it can be avoided!

Exol's aim is to help you succeed in making the most of your vehicles and machinery through reducing unplanned downtime, extending oil drains and detecting potential future failure...before they happen!

FULL DETAILS ARE AVAILABLE ON OUR WEBSITE: www.exol-lubricants.com

FLUID CHECK ON-LINE

PROVIDING FLUID ANALYSIS MANAGEMENT

Exol's FLUID CHECK ON-LINE program is more than just a results portal. It is a powerful tool that we offer all of our customers to help them make the most out of their Oil Condition Monitoring program, available 24/7 on your pc, laptop or mobile device. Using the web service you can:

- View sample data, Download PDF reports and data (via CSV files)
- Manage your assets, from the very top level (Customers) down to the very bottom (Sampling Points)
- View and upload important documents for your customers to view.
- Pre register sampling information into our system so you don't have to fill out sample submission forms.
- Download KPI reports. There is a mass of information you can pull out from a breakdown of the number of samples you have submitted into the laboratory to the number of times a test has failed your test limits.
- Scheduled sampling frequencies and let our system remind you when to take samples
- Data trending. Compare how values change over time and against each other.

We will be happy to guide you through using the website and can arrange either on site or web based training sessions for you and your staff.
